43	10	27.5	9	273	274
44	10.5	28	9.5	280	284

HOW TO FIND YOUR SKATE SIZE

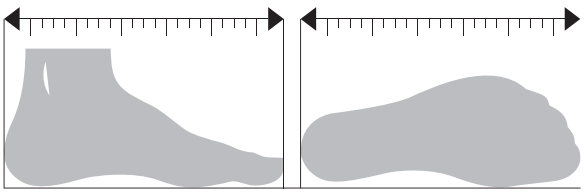

Begin by checking your usual shoe size as a reference.
For the most accurate fit, follow these simple steps:

1. Place a sheet of paper on a hard, flat surface against a wall.

2. Stand with your heel gently touching the wall and trace the outline of each foot.

3. Measure the length from the heel to the tip of your longest toe in centimeters.

4. Use the longest measurement to find your ideal size on the chart above.

CHECK THE FIT

When trying on your skates, your toes should lie flat and may lightly touch the front of the boot—but they should not feel cramped or pressed. A snug, secure fit ensures better control and comfort while skating.
